# Student self-assessment — 30 points

Notes for SHS • Topic 75 • All example student data are synthetic.

## Scoring instructions

Award one point for each of the 30 exercises solved correctly using the stated convention. Total possible: 30 points. This is a nonvalidated self-check, not an official grade.

## Review your mistakes

Questions 1–10: basics; 11–20: applied calculations; 21–30: examination-style and interpretation. Recalculate missed questions.

## Progress checklist

[ ] I can distinguish center from spread.

[ ] I can compute exact-value frequency summaries.

[ ] I can explain why grouped means are estimates.

[ ] I can perform weighted calculations.

[ ] I can verify spreadsheet formulas with mental checks.

## Your score sheet

Level 1 correct: ____ / 10

Level 2 correct: ____ / 10

Level 3 correct: ____ / 10

Total correct: ____ / 30

Next learning goal: _____
